Experience

- DohTech Solutions** 2023 - Current
Full Stack Developer
Involved in building the user interfaces of the Buzme Mobile application as well as implementation of functionalities of the application.
My tasks here involved working on both the frontend and backend of the Buzme application, and integrating the API on the frontend.
The tech stack involved with here are Flutter for the frontend and Express.js for the backend
- Health Research Foundation** 2021 - Current
Full stack developer [Volunteer]
- Spearhead frontend development within the Digital Innovation Hub at Health Research Foundation, utilizing cutting-edge technologies such as Flutter, React.js, and Next.js
- Coordinate the frontend team's activities, including task assignment and milestone management, to ensure the timely achievement of targets.
- Lead the development of StarMum, a groundbreaking platform aimed at supporting expectant mothers and reducing maternal mortality rates by providing crucial information and connecting users with healthcare professionals. Leveraging my keen interest in data science and AI, these technologies play a pivotal role in enhancing the platform's functionality and impact.
- Actively participate in the DSI-Africa CHD AI project, leveraging Python expertise to contribute to model training and further advancements in healthcare technology.
- Camsol** 19/09/2022 - 30/08/2023
Fullstack developer
Worked on several mobile applications with flutter and react-native. Mainly worked on sajent club, built with flutter, which is an app that helps people find jewelry for themselves or their loved ones and also gasvisor which is an app built with react-native that helps to monitor gas levels
- Hebron Global** September 2024 - January 2025
Lead mobile developer
Worked on a mobile application for booking rides similar to how Uber operates. Lead the front end development of the application using flutter. Tasks involved authentication, API integration, Using Google maps to get directions, search places, live tracking and also payment integration. The app involves both a driver and rider side hence making it a two-sided application

Skills

- Flutter
- JavaScript
- Next.js/React.js
- Node/Express.js
- Typescript
- Python/ML

Personal Details

- Nationality : Cameroonian

Education

- GBHS Mankon** 2016
GCE O-LEVEL
9/10 papers
